

DESCRIPTION

The **Tecsel® Bands** are flexible intumescent graphite strips in a polyethylene cover.

The **Tecsel® Bands** are the most effective solution to protect pipes which run through irregular walls or if fixing if too complicated.

Its simplicity and ease of installation result from the product flexibility. The **Tecsel® Bands** work excellently in each everyday-work situation.

The **Tecsel® Bands** are resistant to temperature and humidity variations and their properties do not deteriorate in harsh conditions.

TESTS

The **Tecsel® Bands** have been tested in compliance with the European Standard **UNE EN 1366-3**.

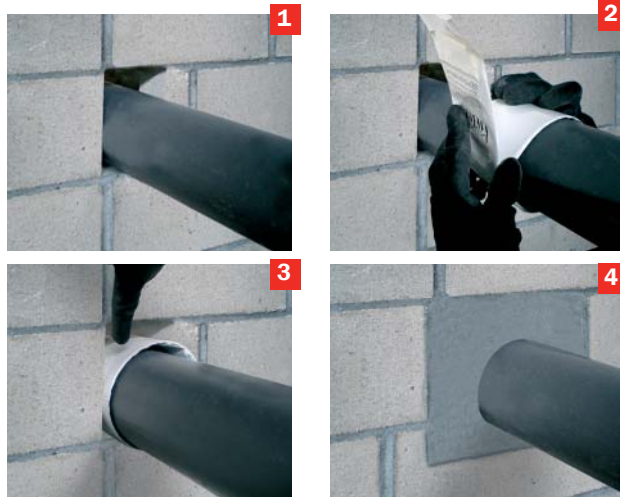

MODELS

MODELS	DIMENSIONS*
Tecsel® Bands	110 mm
Tecsel® Bands	125 mm
Tecsel® Bands	160 mm

**Other dimensions upon individual order.*

APPLICATION

The **Tecsel® Band** is installed around a pipe inside the wall or floor. Finally the Band is secured with adhesive tape on the outer surface.

- 1 Plastic pipe running through various fire sectors.
- 2 Adjust the **Tecsel® Band** and check the pipe size.
- 3 Push into the hole and secure with adhesive tape.
- 4 Provide the desired finish to the penetration. The **Tecsel® Band** remains in the wall. (Optionally).

HEALTH AND SAFETY

The following considerations must be taken into account when handling **Tecsel® Bands**:

- Wearing protective gloves to protect the hands is recommended.
- Respect the regular work measures.

Consult the safety datasheet for further information.

STORAGE

Keep in a dry and well ventilated place.
