

### DESCRIPTION

The **Tecsel® Pillows** consist of intumescent graphite combined with silicates, packed in polyethylene bags covered with mineral fibres.

The **Tecsel® Pillows** provide a flexible solution for filling irregular openings around pipes and wire bundles, as well as for closing openings in walls or floors.

The **Tecsel® Pillows** are very easy and quick to install, which makes them specific among other sealing systems.

They facilitate maintenance works, as they may be easily removed and replaced.

### TESTS\*

The **Tecsel® Pillows** have been tested in compliance with the European Standards **UNE EN 1366-3**, **UNE EN 1363-1**, and with the British Standard **BS 476 parte 20**.

### MODELS

MODEL	DIMENSIONS*
<b>Tecsel® Pillows</b>	330 x 200 x 45 mm
<b>Tecsel® Pillows</b>	330 x 200 x 25 mm
<b>Tecsel® Pillows</b>	330 x 50 x 20mm

\*Other dimensions upon individual order.

### STORAGE

Keep in a dry and well ventilated place..

**NOTE:** The instructions and technical data appearing in this data sheet are based on our experience and current knowledge. We decline any responsibility regarding consequences of inappropriate use. Thereby, our warrant is limited exclusively to the quality of the supplied product. This Data Sheet may be updated without prior notice. (Ask for its update if necessary).

### APPLICATION AND USE

Lay **Tecsel® Pillows** by hand, filling the existing gaps and openings, with the lognger side along the wiring or pipes.

Make sure all open areas have been filled and the **Tecsel® Pillows** are pressed enough. Check also if the **Tecsel® Pillows** filling is evenly distributed.

The **Tecsel® Pillows** are particularly useful in the places which are often or constantly changed. As they are laid without additional works, they are particularly useful in the places where maximum cleanness is required.

If the **Tecsel® Pillows** have not been exposed to fire, they may be used for unlimited period of time.

### HEALTH AND SAFETY

The following considerations must be taken into account when handling **Tecsel® Pillows**:

- Wearing protective gloves to protect the hands is recommended.
- If the pillows are damaged, its interior can irritate the skin, eyes or affect the respiratory system.
- Respect the regular work measures.

Consult the safety datasheet for further information.
